

Yet Another Floor Plan

This one is by Larry Avramidis. It features a large central area, where the non-bearing wall currently between Rooms 125 and 126 is removed. Then around the edge are *Teaching Pods*.

I made some modifications to Larry's plan. If we take the doors at the back of Rooms 134 and 137, which are circled in blue, and convert them to *Emergency Only*, then we can remove the wall that I have outlined in red. Then the entrance to the lab could be placed somewhere like the green lines in the above diagram.

This modification to Larry's plan gains us even more space by converting the current corridor between the lecture rooms and the current lab into usable space.
